Indoor advertising machine specifications and parameters

PRODUCT MODEL	P1.86
Pixel spacing	1.86MM
Physical density	289444/㎡
Luminous point color	1R1G1B
Whole machine resolution	W344*H1032
Display size of the whole machine	W640mm*H1920mm
Cascade display	Multiple seamless splicing displays are available
LED Packaging	SMD1515
Drive mode	Constant current drive
Scanning method	1/43scan
Interface method	HUB75
White balanced brightness	600cd/㎡
Maximum power consumption	800W/㎡
Average Power	200W~300W/㎡
Insert voltage	220V AC±15%
Viewing distance	≥1.9M
Protection grade	IP40
Product feature	
1. High definition display: Provides clear and vivid images and text display	
2. High brightness: can maintain excellent brightness and visibility in various environments	
3. Customizability: The size, shape, and content can be customized according to customer needs	
4. Energy saving and environmental protection: Compared to traditional display screens, LED advertising screens are more energy-efficient	
5. Remote control: supports remote management and content updates	
6. Good advertising effect: attracting attention, enhancing brand awareness and advertising effectiveness
